

TSDO-04UNI

Safe digital output FTA (24/48/110 Vdc, 4 channels)

Description

Field termination assembly module TSDO-04UNI is the interface between system interconnection cable SICC-0001/Lx and the external field wiring (screw terminals). The four channels of a (redundant pair of) SDO-04x module(s) or SDOL-04x module(s) can be connected to the TSDO-04UNI module via system interconnection cable SICC-0001/Lx.

The FTA module has a universal snap-in provision for standard DIN EN rails, and screw terminals for connecting field wiring.
